Subject: Oppose Mohave Electric Waste-to-Energy Proposal - Docket No.E-01750A-10-0453

OPEN MEETING AGENDA ITEM

Jul 1, 2011

Commissioner Sandra Kennedy
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Sincerely,

Mr. Raymond Sol
14401 N 27th Pl

Jul 1, 2011

Commissioner Sandra Kennedy
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

It is polluted enough already here. Are you people crazy? We have pollution warnings too much as it is. This is a BAD IDEA!!!

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Sincerely,

Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Sincerely,

Ms. Georgia Braithwaite

Subject: Oppose Mohave Electric Waste-to-Energy Proposal - Docket No.E-01750A-10-0453

Jul 1, 2011

Commissioner Sandra Kennedy
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Subject: Oppose Mohave Electric Waste-to-Energy Proposal - Docket No.E-01750A-10-0453

Jul 1, 2011

Commissioner Sandra Kennedy
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. This is a lazy politicians effort to reduce costs and it's ridiculous how consistent this country seems to be at sacrificing our environment for the profits of a small few. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the deformation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. Subject: Oppose Mohave Electric Waste-to-Energy Proposal - Docket No.E-01750A-10-0453

Jul 1, 2011

Commissioner Sandra Kennedy
1200 W. Washington St.
Phoenix, AZ 85007

Dear Commissioner Kennedy,

I am writing to ask you to please reject the application from Mohave Electric Cooperative to seek a waiver or a pilot project for a waste-to-energy plant.

Burning municipal solid waste is not a renewable energy resource and there is no innovative technology involved, so this waste-to-energy project does not qualify as a pilot project. It should not be granted a waiver either, because there has been no demonstration of the need for such a waiver by the applicant and the project is inconsistent with the goals of the Renewable Energy Standard.

I am also concerned about the air pollution this facility would generate, especially if it is located in the Phoenix Nonattainment Area for ozone and particulates, as the applicant has indicated. These facilities emit hazardous air pollutants, such as mercury, compounds that contribute to the formation of ozone, and many others.

If approved, this facility and others like it could have a negative impact on efforts both to reduce waste and to promote recycling.

Recycling is well-established in many of the Phoenix-area communities and there are ongoing efforts to expand programs to include more multiple family dwellings, as well as businesses. This facility could hinder those efforts and take our communities backward by allowing materials that could otherwise be recycled to be fed into this facility.

I urge you to reject both the waiver and the proposed pilot program and to instead keep our Renewable Energy Standard focused on solar, wind, and other truly renewable resources. Thank you for considering my comments.

Sincerely,

Mr. Kim Johnson
